

10 Useful Things You Can Ask ChatGPT to Do for You

A simple beginner's guide to getting more useful answers from AI

TechPulse

ChatGPT can do much more than answer questions. You can use it to learn, plan, write, organize information, solve everyday problems, and brainstorm ideas. The key is to tell it clearly what you need.

Tip: You can copy any of the prompts below and replace the words in [brackets] with your own information.

1. Write or Improve Your CV

Ask ChatGPT to turn your experience into a clear, professional CV. You can also ask it to improve wording without inventing experience.

Try this prompt: "Help me create a professional CV for a [job title]. My experience is: [describe your experience]. Keep it honest and suitable for a beginner."

2. Prepare for a Job Interview

ChatGPT can act as an interviewer and give you practice questions, feedback, and better ways to structure your answers.

Try this prompt: "Act as a job interviewer for a [job title]. Ask me one interview question at a time and give me feedback on each answer."

3. Explain Something You Don't Understand

Instead of searching through complicated explanations, ask ChatGPT to explain a topic at your level.

Try this prompt: "Explain [topic] to me like I am a complete beginner. Use simple language and give me a real-life example."

4. Create a Study Plan

You can give ChatGPT your subjects, available time, and deadline and ask for a realistic study schedule.

Try this prompt: "Create a 4-week study plan for [subject]. I can study [number] hours per day, [number] days a week. Include revision and practice."

5. Write a Professional Email or Message

ChatGPT can help turn a rough message into something clear and polite while keeping your meaning.

Try this prompt: "Rewrite this message so it sounds professional, friendly, and clear: [paste your message]."

6. Plan Your Budget

You can use ChatGPT to organize your income and expenses and identify areas where you might be able to cut costs. Always check the calculations yourself.

Try this prompt: “Help me create a monthly budget. My income is [amount]. My regular expenses are [list expenses]. Separate needs, wants, savings, and debt payments.”

7. Brainstorm Ideas

If you're stuck, ChatGPT can generate ideas for content, projects, business concepts, names, or activities and help you compare them.

Try this prompt: “Give me 20 realistic ideas for [website/business/content/project]. Avoid get-rich-quick schemes and focus on ideas that solve real problems.”

8. Turn Notes Into a Clear Document

Give ChatGPT your rough notes and ask it to organize them into a clean article, checklist, report, or set of instructions.

Try this prompt: “Turn these notes into a clear, well-organized guide. Keep all important information and do not add facts that are not in my notes: [paste notes].”

9. Learn a New Skill Step by Step

You can ask ChatGPT to teach you progressively instead of giving you a huge amount of information at once.

Try this prompt: “Teach me [skill] from beginner level. Give me Lesson 1, a simple exercise, and a short quiz. Wait for my answer before moving to Lesson 2.”

10. Solve an Everyday Problem

Describe the situation, what you have available, and what you want to achieve. ChatGPT can help you think through possible solutions.

Try this prompt: “I need help with this problem: [describe the situation]. My goal is [goal]. I have [resources/limitations]. Give me 3 practical options and explain the pros and cons of each.”

A Better Way to Use ChatGPT

Don't be afraid to ask follow-up questions. If the first answer isn't useful, tell ChatGPT what to change: make it simpler, give more examples, shorten it, explain step by step, or adapt it to your situation.

Important: ChatGPT can make mistakes. For important decisions involving money, legal matters, health, employment requirements, or other high-stakes topics, verify important information with a reliable source or qualified professional.
